

**NEWS RELEASE**  
**WATER METER REPLACEMENT UNDERWAY**

**January 24, 2008**

For the past several days, crews from the H&K Services have been actively replacing water meters for Town of Evans residents. According to Supervisor Fran Pordum, the meter replacement program began in the north end of Town and has continued on schedule

He mentioned that residents will receive a letter and a tag at their homes requesting they phone H&K Services so that appointment can be made. Homeowners should contact H&K Services directly at 1-866-588-5290 or [evansmeter@h-k services.com](mailto:evansmeter@h-k-services.com) to schedule the time for the meter replacement.

Water meter replacement as well as the new hydrant installation is part of the overall improvements in the Town's infrastructure that will result in a better water system for years to come.
